AVIGILON AI APPLIANCE

EVOLVE LEGACY CAMERA SYSTEMS INTO POWERFUL AI SOLUTIONS

The Avigilon AI Appliance adds patented self-learning video analytics and Avigilon Appearance Search™ technology to nearly any IP camera. Engineered for high performance, capacity and resiliency, the AI Appliance features leading-edge hardware and comes in two models to support up to sixty 2 MP cameras for enterprise scalability.

### VIDEO ANALYSIS FOR NON-ANALYTIC CAMERAS

Bring the intelligence of Avigilon self-learning video analytics to any ONVIF® compliant third-party camera, allowing accurate recognition of the movement of people and vehicles.

RELIABLE AND EASY TO INSTALL HARDWARE AND SOFTWARE

Built on the same platform as the latest Avigilon NVRs, includes onsite parts delivery, and works with Avigilon Control Center (ACC) software out of the box with minimal configuration.

APPEARANCE SEARCH CAPABILITIES

When combined with ACC™ software, the on-board GPU allows operators to search for a person by selecting certain physical descriptions, including clothing color and gender, regardless of the NVR used.

AVIGILON & 3RD PARTY CAMERAS — VIDEO DATA → NVR → VIDEO DATA → AI APPLIANCE — ANALYTIC DATA — AVIGILON APPEARANCE SEARCH
