

# COMPREHENSIVE SECURITY MANAGEMENT FOR HOSPITALS AND NURSING HOMES

## ALLY IN ACTION

### Scenario #1

A patient's family is threatening a nurse in order to gain access to an off-limits area. The nurse reports the incident to security.

Security personnel log the incident into Ally.

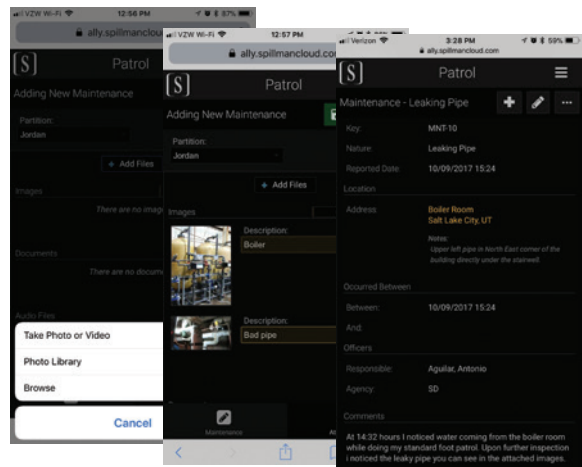

An officer is dispatched to the patient's room. The officer de-escalates the situation, enters his comments into the Ally incident record, and sends it to his supervisor for review.

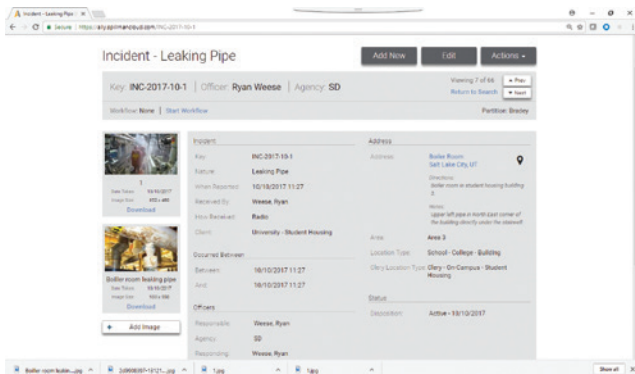

### Scenario #2

While making rounds, a security employee notices a leaky pipe in the boiler room.

The employee creates a new maintenance record in Ally.

Maintenance is alerted of the issue and dispatched to fix the pipe.

## With Ally You Can:

- Track Incident Information
- Dispatch
- Create Workflows
- Manage Training
- Attach Almost Any Electronic File
- Manage Maintenance Tasks
- Easily Train Employees
- Create a Mobile Command Center

## About Ally

Ally stores all security data in one centralized database and provides complete data integration throughout the system.

Ally's web-based nature means your personnel have mobile access to store, search, retrieve, and report on any system data anywhere and at any time, using any device with an internet connection.

You can take advantage of customizable fields and built-in analytics that make accurate data capture and reporting convenient and efficient.

Ally's intuitive, user-friendly design makes it easy to navigate throughout the site, even if you have little or no software experience.

Motorola Solutions maintains and updates the Ally software, following the same critical security standards enjoyed by law enforcement. This saves security agencies the cost of maintaining their own server.
