

ZONAR LOGS™

Ensure compliance, then get on with business.

PREVENT

violations with
preemptive alerts

ENSURE

compliance with
the latest laws

AUTOMATE

logs and HOS
reporting

MONITOR

driver compliance
and safety

Protect your drivers.

Make sure your drivers operate safely and comply with the electronic logging device (ELD) mandate. [Zonar Logs](#) is self-certified with the U.S. Federal Motor Carrier Safety Administration (FMCSA). It's also completed end-to-end testing, successfully transmitting log data while roadside to the same eRODS system used by state and federal law enforcement members to verify compliance.

Make it user friendly.

The easier a new technology is to use, the easier it makes being compliant. Drivers access Zonar Logs through their Zonar tablet to view their available hours, update their duty status, and electronically certify and submit their Hours-of-Service (HoS) records. Its Roadside View™ feature makes it easy for law enforcement to view the driver's logs during a roadside inspection. Roadside View and back-office view display information uniformly, so drivers and dispatch can communicate more easily.

Monitor compliance.

Keep an eye on your drivers' safety and compliance, and get the data necessary to make informed decisions about ensuring both. Zonar Logs' Compliance Insights is an effective, efficient dashboard available within Zonar's [Ground Traffic Control®](#) web portal. There, you can access key data such live statuses, availability, performance and HoS.

Spot trends in violations.

See the count per violation to see trends—by driver or by fleet—you may need to address. By breaking down each violation in a given time period, the HoS violations show current driving behaviors and trends, including rest breaks, daily drives, on duty and weekly on-duty violations.

Features

- Meets Canadian regulations for Cycle 1 and Cycle 2
- Meets title 49 CFR 395 ELD and HoS supporting documents
- Self-certified with FMCSA
- FMCSA registered
- Alerts drivers of approaching violations
- Roadside View for easier inspections
- Unidentified drivers logs
- Live Status map view
- Count per violations
- Automatic software updates with new and updated laws
- 24/7/365, U.S.-based technical support from Zonar Customer Care

See each driver's availability.

Know which drivers are available when so you can better plan upcoming trips. In one comprehensive table, Zonar Logs gives you details for the available ON and DRIVE hours for each driver in your fleet. It also displays their current location, duty period and hours to be gained from the rolling 7/8 days.

See each driver's live status.

Make the most of your fleet. Zonar Logs features a Live Status map view that shows each driver's current location and duty status. Easily see which drivers risk being in violation—or if they already are. And see drivers' current address, direction in which they're going and asset they're using.

View unidentified driver logs.

Keep logs accurate and stay compliant. Zonar Logs shows unidentified driving trips generated when drivers begin and end a trip, but don't log on to the tablet before putting the vehicle into motion. See which vehicle was used, the start and end location, and the last known driver.

Drivers can stay up to date.

Zonar Logs includes a drivers dashboard, an online portal where drivers can log in with their email—at any time— from their computer, phone or other mobile device. There, they can easily update their duty status to ON or OFF to stay up to date.

Keep it seamless and safe.

Zonar Logs automatically tracks drive time. Data is electronically captured and stored online, where you can access it and view driver logs by day, week and month. And it's all through Ground Traffic Control, which makes Zonar Logs tamper resistant.

Get expert help with compliance.

Compliance and safety programs are critical if you want to succeed. We're here to help and so is our dedicated team of compliance experts, who have decades of experience in transportation combined. If you have questions about current or proposed industry regulations, contact us for a complimentary consultation.

Get customer care that cares.

The care we provide is the most important service we offer. Our U.S.-based Customer Care centers are available 24/7/365 to answer simple questions and help solve complex problems. We call it "Customer Care" because we truly do care—period.
